Subject: Request for input on sampling locations

Patti,

I just talked to Mark Brady about several things, and it came to light that the letter I sent out (see below) may not have been as clear as it could have been.

I am looking for input from the Colville Tribe on whether there are additional beach areas of tribal interest that you would like us to substitute or add to the sediment sampling program in 2005. I would like to get this information as soon as possible.

We will be sending out our Sediment Sampling Approach and Rationale document within the next 2 weeks. Once the document has been distributed, I will be setting up a meeting with everyone to discuss the document and answer questions that people may have.

Thank you for your help on this matter.

**MEMORANDUM**

**SUBJECT:** Distribution of Preliminary Locations for Sediment Sampling for the Upper Columbia River

**FROM:** Kevin Rochlin, Project Manager

TO: Addressees

Enclosed is preliminary information on sampling locations for the CERCLA Spring 2005 sediment sampling planned for the Upper Columbia River. I have included maps showing sampling locations, a table summarizing the locations and approximate sample elevations, information on the types of samples to be taken (shallow grabs, cores etc), and a GIS overlay with sample location information. This package was prepared for Cultural Resource consultation. However, I believe that it serves the added purpose of providing you an opportunity to become familiar with our proposed locations prior to our next submittal which will includes our rationale for each location and type of sample we are taking.

We have selected proposed beach areas on Tribal lands and in National Parks. I am looking for feedback on whether you believe that we have selected appropriate areas for your respected needs, or whether other areas are more appropriate.

I am planning on setting up a conference call in the near future to further our discussions on these locations. I look forward to talking to you then. Please feel free to contact me in the interim to discuss this information. I can be reached at (206) 553-2106.
